

Who does not need a BER?

These types of buildings do not need a BER:

- Protected structures
- National monuments
- Buildings used as places of worship.
- Temporary buildings
- Non-residential agricultural buildings with an installed heat capacity that does not exceed 10W/m²
- Industrial buildings with an installed heat capacity that does not exceed 10W/m²
- Stand-alone buildings with a total floor area of less than 50m²
